<b>Load To Copy:</b>	Available now																
<b>Web Services: (API and Messaging)</b>	Applicable to all Classic API customers using the OTA_HotelAvail message																
<b>Issue History:</b>	Version 01																

## Overview

Customers need the ability to access Travelport Worldspan Master SecuRate codes (MSPC). To accommodate for the use of the Hotel Master Plan Code SecuRate, a customer may place a maximum of (1) one 6-character Hotel Master Plan SecuRate code in the element and attribute <RatePlanCandidate RatePlanCode="XXX123"/>.

If more than (1) one Hotel Master Plan SecuRate code is entered into the RatePlanCode attribute, an error response is returned to the customer (please see error sample below).

The attribute, RatePlanCode, may now contain a 6-character Master SecuRate Plan code (MSPC) and has been utilized to send this code.

The MSPC can only be one occurrence and cannot be combined with existing rate plan codes.

## Customer Benefit

- This enhancement allows customers to be able to search for multiple rate codes in one transaction. This reduces entries and make the booking process much easier.

## Detail and Customer Example

Shown is an example (for illustration only) of an OTA HotelAvail request message with the use of a new request attribute containing the Hotel Master Plan SecuRate code:

Request:

```
<OTA_HotelAvailRQ Version="1" MaxResponses="50">
