

## Welcome XML Select Customers!

We are proud to present you with the latest version of XML Select. We have provided a complete help system update, with new and updated DFLs for several new transactions.

Click in the Release Notes topic after extracting the zip file to view the *What's New* topic. This page provides a summary of all the latest enhancements, and a clickable interface to review detailed changes.

**Previous Users of XML Select** – It is essential that you review the Archived Transactions section prior to upgrading your systems. Additionally, for the previous XML Select 2.4 MU4 and MU3 release, we release a new DLL file and provided all new DFL files. You will not be able to use the old DFL files.

**New Users of XML Select** – Make sure your system meets all of the necessary requirements before starting the installation process. If your system does not fully meet the criteria outlined in the requirements section, please refer to the supplemental directory for the appropriate upgrades.

As always, we are interested in your feedback. Please report any problems you are experiencing via the On-Line Reporting System through ASK Travelport. General comments are welcome as well and can be sent to [tto.apiprovisioning@travelport.com](mailto:tto.apiprovisioning@travelport.com).

Sincerely,

XML Select Product Team
